MOSLER GT3 REAR WHEEL ARCH KIT

- Mosler Europe have developed a wheel arch kit to help reduce lift, reduce drag and reduce positive pressure in the engine bay.
- The kit helps increase negative pressure in the engine bay, and aids air extraction through the side vents.
- There is a significant reduction of dirt and water dumped into the engine and gearbox area. We all know how bad it is after a wet race!
- The wheel arch kit can be supplied untrimmed as detailed, or 80% finished for final fitment (price to be decided).
- All prices are plus vat where applicable.

Untrimmed Upper Panels

Part Number : MTRGT3-BO-0209L/R

Price: £728 each

Untrimmed Lower Panels

Part Number : MTRGT3-BO-0210L / R

Price: £299 each
